

Customer Case Studies

Project Overview

Customer Format: Retail Store Chain

Project Name: Confidential

Completion Time Frame: 120 days

Number of Locations: 921

Customer Requirement: Cutover to new Cisco router and VLAN port map. Segregated wireless network traffic from point of sale traffic for PCI compliance.

R&R Methodology Advantage: R&R employs an experienced team of Managed Services professionals. We incorporate teams within our national logistics coverage. This consists of our own warehouse, driver/ technician and vehicles. Our ability to plan, resource and manage the Turn-key execution of emergency customer projects provides cost savings and eliminates handoff and multi-vendor coordination costs.

Project Scope

On Site Activities:

- Remove 4 existing Cisco Access Points
- Run new home run cable for 5th Access Point
- Install 5 new Cisco Access Points
- Clean up production troubleshooting bench with cable management.
- Install approximately 3 new Cisco switches in troubleshooting bench.
- Tone 4 home run cables for troubleshooting bench to communications closet.
- Test all new cables with cable tester for cross talk and continuity
- Cut over to new network

Summary

The project was completed on time within the strict PCI required deadline.
